Good	Native	Native

INTERESTS

To work on new things

Learning new Technology

Problem solving

Sketching and Drawing

I'm a Full Stack Developer. I'm skilled in HTML, CSS, JavaScript, Bootstrap, and Tailwind for making websites look good. I can create interactive websites using React JS and Next.js. I also handle the backend with Node.js and Express.js. I enjoy collaborating with teams to build user-friendly websites.

PROJECTS

Whats app clone (11 June 2023 - Present)
Developed a full-stack chat application using Next.js and Node.js to enable real-time communication

- Created a responsive UI with Next.js, managed state with Redux, and used Socket.IO for real-time messaging.
- Designed backend logic with Express.js, utilizing MySQL for data storage.

`React JS` `Tailwind CSS` `Context API` `Router` `Redux` `Axios` `Node.js` `Express.js` `MongoDB` `AWS S3` `Razorpay`

Mail Box (13 April 2023 - Present)
Developed a Mail Box client website using React.js library.

- User can view total unread mail and receive, send mails to another register user.
- Used Redux for efficient state management, GitHub for version control.
- Firebase authentication to ensure user security and storing data.

WORK EXPERIENCE

Sharpener Tech (01 November 2022 - Present)
Learning Platform

- As a Full Stack Developer learner at Sharpener Technology Institute, I focused on React.js and Next.js for frontend development, where I created dynamic interfaces and implemented responsive designs.
- I also gained experience in backend development using Node.js, Express.js, MySQL, and MongoDB.
